

Red Cross Spearmint OR Dr. King's Peppermint PEPSIN Chewing Gums

Chew them for the cure, pleasant and permanent flavor, and save the coupon-wrappers for magnificent free gifts.

Red Cross Spearmint and Dr. King's Peppermint Pepsin GUMS

are made of the purest and best materials in the cleanest factory in Canada—they can't be found in the best gums on the market.

VALUABLE GIFTS FREE FOR WRAPPERS

The inside wrapper of each gum is a coupon. Save them and get your selection from hundreds of beautiful gifts—photographs, watches, clocks, jewelry, sporting goods, silk, cashmere, etc., which picture the gems and costs of some of the 30 principal cities of Canada, etc. Get these gifts and begin to save the coupons today.

Get the Catalogue of "hundreds of gifts" at the store or write us for it.

CANADIAN CHOCOLATE CO., LIMITED
PETERBOROUGH, ONT.

Made by Canadian in the most modern
up-to-date and cleanest factory
of located in Canada.

BEAUTIFUL GIFT

To St. James' Church, Dundas, On Saturday.

Memorial Window By Wife of the Rector.

(Special to the Times.)

Dundas, April 12.—At the Memorial Window yesterday George M. Frank gave a very interesting talk on the history of the church, and the discussion which followed was of a profitable character.

Mrs. W. H. Moss, Miss Lina Moss and Miss Ruth Moss are visiting in Toronto.

Miss Jessie Koenig, of Postville, and Miss Rose Smiley, of Chippewa, and Miss Janet Lanaway, of Weston, are among the teachers who are home for the Easter vacation.

Misses Rogers, Hill, Cowan, McKnight, of the local schools, are at home for Easter.

Miss Jeanie Dymond, of the Ontario Ladies' College, Whitby, is home for the holidays.

On Good Friday at St. James' Church the three-day devotion service was held, when Rev. Mr. Judd, of the Church of Chatham, Hamilton, presided.

The services yesterday at St. James' Church were attended by unusually large numbers of communicants and adherents.

The social service was held in the church for the Sunday school scholars, when the Lenten plans were presented.

The usual Easter services were held in Knox and Methodist Churches, the latter having musical numbers and floral offerings. At St. Agnes' Church the decorations were very beautiful.

The altar being a scene of lovely beauty. The augmented choir furnished special music, and Rev. Father Feeney gave an appropriate sermon.

Knox Church Sunday School scholars will give a cantata on May 1. One of the features of the affair will be a boy's quartet musical drill.

On Saturday afternoon a good-sized congregation at St. James' Church a beautiful stained glass window recently installed was unveiled by His Lordship the Bishop of Niagara, who read a short service.

The window, which was made by the N. L. Co. of Toronto, is a companion window of the Leonard memorial window, and the subject is "The Ascension." It is the gift of Mrs. Irving, wife of Ven. Arch. Irving, of St. James' Church.

IN JAIL ON FRAUD CHARGE.
Miami, Fla., N.Y., April 12.—A man claiming to be Count Max Luxembourg Lyar, of Germany, was arrested at Brimley, Ont., yesterday on a charge of grand larceny, involving \$5,000. London was brought here and locked up in the county jail. He will be arraigned Monday.

The complainant, Mrs. Alice Laffin, of this city, charged that London obtained two notes from her for \$2,500 each with which to exploit a self-styled "larceny" claim to have patented. She said the patents had never been granted. London denied that there had been any intent to defraud.

To clear a castle from place it in the oven long enough to melt the wax and then rub quickly with a cloth and polish. If it seems necessary.

CANCER STUDENTS

American Surgical Association In Convention.

Childless Women Said To Invite the Disease.

New York, April 12.—A disagreement over the action of radium on tissues of the human body arose yesterday at the closing session of the American Surgical Association's convention at the Hotel Astor.

Dr. Robert Abbe, of New York, one of the best known advocates of the use of radium after Dr. Sparran, a pupil of Aston Von Biering, of Vienna, had said radio-activity made women many cases of malignant tumor.

Dr. John M. T. Finney, of Baltimore, who returned the presidency of Princeton after Woodrow Wilson resigned, caused a stir among the assembled surgeons by declaring that "cancer disease of the breast in women is a protest against modern civilization."

Other surgeons who followed Dr. Finney confirmed his statement that childless women, and those with a child they do not nurse are the chief victims of cancer disease of the breast.

Dr. Von Biering, of Vienna, said to attend the convention, sent Dr. Sparran his resignation.

"We have treated 65 cases of malignant tumor with radium," Dr. Sparran said. "Of these 17 died, 5 from other causes than the tumor; 5 were benefited, 5 cases showed no effect and 14 cases were positively aggravated—made worse by the radium treatment."

Our experiments in Vienna with radium show that it is effective only in superficial cases of malignant tumor. And even then it is effective in no marked degree. Radium has actually aggravated many bad tumors by destroying healthy tissue around them, so that there was nothing left to check the tumor's spread."

"We have therefore come to the conclusion that the recurrence of cancer tumors has been somewhat hastened by post-operative irradiation possibly caused by radium."

Behind closed doors the surgeons decided to hold their convention next year at Rochester, Minn., the home of Dr. William J. Mayo, retiring president of the association.

WORK for a rise. How? Learn something the other fellow doesn't know. Go

ahead. It's a cinch that you'll get a rise if you gain knowledge that has an actual cash value—you'll COMMAND more cash because you are WORTH MORE than one that lags behind. Whatever position you now hold you must keep up with the times if you would ADVANCE. Better still, you should keep AHEAD OF THE PROCESSION. The latest and greatest NEW knowledge concerns the Panama Canal. To know about this modern wonder is to have something "up your sleeve" that will add to your "market value."

Your Money Refunded If Not Satisfied

NEW BOOKS

Recent Additions to Shelves of the Public Library.

Book received during week ending April 12.

(Fiction)

Chambers, R.—Quick Action, 1227. Poe, satire and realism whirl through the pages in daring fashion.

Findlater, M.—The Blind Bird's Nest, 1489.

Locke, W. J.—The Portentous Yogh. 1760. Story of a ragamuffin stum boy who runs away from cruelty, squallor, etc., to seek his fortune. There is vigor, wholesomeness and humanity in the tale.

McCall, S.—Ariadne of Allan Water, 1484. Charm of scene as well as subtle characterizations are here present as in the favorite author's previous novels.

Osborne, W. H.—The Blue Book, 1, 254k. A tale of mystery, love and adventure.

Stancil, B. W.—North of Fifty-three, 1484. A love story of the unexplored Northwest with excellent characterization.

Parkinson, L.—Paradise, 1480. A delightful story of a boy's heart by one who knows men through and through.

(Religion)

Mora, G. F.—History of Religions, China, Japan, Babylon, Assyria, India, Persia, Greece and Rome, 2093k. In the presentation of the several religions an endeavor is made to show their relation to race and physical environment and to national life and civilization, to trace their history, and to discover the causes of progress and decline.

(Sociology)

Appell, N.—The Foundations of International Policy, 3164k. In this book is shown systematically and with great clearness the nature of those forces which are transforming the relationship of States, and the mechanism of organized society.

Holmes, A.—Principles of Character-

Making, 3771k. Teachers and parents will find this book of great value as a basis for child training.

Poe, S. S.—The careful investor, 3324k. This volume clearly describes the different forms of investments, and gives the general rules to follow to secure safe investments.

Malville, F. J.—All about postage stamps, 2532k. The matters which concern all postage stamps are explained as briefly as possible with explicitness in the first section of this book in which is attempted a first grammar of Philately.

Polkars, R.—How France is governed, 2424k. An interesting and valuable account of the whole framework of French administration.

(Natural Science)

Smith, E. F.—Chemistry in America, 2408k. A history of the development of chemistry in the United States.

Hale, K. J.—Health Through Diet, 61321k. A practical guide to the uric-acid-free diet, founded on eighteen years' personal experience.

Larned, L. H.—One Hundred Salads, 6411k. One Hundred Cold Dishes, 6411k. The author is a recognized authority on the subject and gives the results of his experience, thought and ingenuity.

Murray, B. C.—Athletic Training, 61211k. This book contains the fundamental principles of correct training for every athletic event, and for the building up of strong bodies.

Hicks, A. M.—The Craft of Hand-Made Rugs, 7461k. A practical guide for those who are interested in this handicraft of our grandmothers' day.

Bleeker, L. A.—From the Porch, 824k. A discourse on the Christian's duty as a citizen.

Varilla, P. Bunau—Panama, the Creation, Destruction and Reurrection, 1298k. The author of this history, which is one of the greatest living authorities on the subject and this history of his life work is for all lovers of energy, determination and patriotism.

Dreconell, N.—Through Japland to the Lorian Swamp, 9167k. An adventurous journey of exploration and sport in the unknown African forests and deserts of Japland.

Le Blond, Mrs. A. L.—The Auto-Prin-

cess of Aldenburg, 55071k. The life story from her own pen of this singularly attractive woman, who left the country of her birth when a girl because of religious intolerance and retired to Denmark, where, after her marriage to the Count of Aldenburg, she was the victim of endless tyrannies, persecutions and hardships.

Lombard, S. H.—Rival French Counts, 55071k. The experiences of a lady-in-waiting (Madame de Staël) at Versailles and in the Bastille.

Meynell, R.—The Life of Francis Thompson, 552771k. One of the most fascinating literary biographies.

Scully, W. C.—Further Reminiscences of a South African Pioneer, 55077k. Phases of S. African life hitherto scarcely touched by literature, being recollections from 1875 to 1899.

(Books for the Blind)

Barclay, F.—The Roarers, 8650k. 3822k.

ITALY'S STRIKE

Government Preparing For Big Rail Trouble.

Will Use Army and Navy To Aid Posts.

Rome, April 12.—Both the railwaymen and the Government are preparing for the struggle which, it is anticipated, will begin next Wednesday, if the railroad employees carry out their threat to bring a general strike. The railroad men are keeping their plans for the contemplated walk-out secret. The Government has ordered all the prefects in the kingdom to return to their posts, and also is organizing a service along the coasts and will put it into operation in case the strike is called. Warships

will be used in this service, but principally for carrying the mails.

Should the strike be declared April 13, it will prove a most important time for tourists, as on that date commences the sixty per cent reduction in all railroad fares to some of the best-known resorts. During the season a quarter of a million people visit the capital.

In addition to the army, the naval fleet will be employed to facilitate communication and maintain order. In this way the Government hopes either to check the strike or minimize its effects. In the attitude the Government appears to be supported by public opinion, which is not favorable to that section of the railwaymen which is advocating the employment of strong coercive measures.

The various organizations of civil service employees have already planned at what points to erect barricades and are in readiness to take possession of various offices. They believe that they have some of the army officers are under orders to join their ranks. A detachment have been concentrated at those places considered the most dangerous, especially in Milan and in Rome.

Independent Labor Attacks Party Plan

(Continued from Page 1)

even more drastic action, and suggests abstention from the exercise of the franchise when the party plan is in the field; whilst yet another section refuses to hold one seat in a double-membered constituency in preference to one of the other parties.

The persistence of this policy of the constitutionists is urged upon the labor members as worthy of approval on the floor of the House of Commons, as a further means to the end of securing the breakdown of the present system and the introduction of a new one, which will render possible the real consideration of any other legislative measures than those which have received cabinet approval and adoption.

Further items of the I. L. P. policy are vehement opposition to increased expenditure on armaments, and to any budget which does not provide a substantial reduction of food taxes.

GUNMEN PAID THE PENALTY

(Continued from Page 1)

to the death cell. There he found a crowd of men with pale faces. The condemned man clutched a crucifix in his hand as he was led to the execution of the gallows. He had to be supported by two keepers.

The crowd of men who heard the murmur of the other prisoners in their supplications for mercy. The Warden and his assistants stepped back from the scene.

"Oh, God, I must my God," gasped the Italian, who had been turned the switch.

A new lot of witnesses filed in. Through the little window presently came "Whitey Lewis." He was garbed in a black suit of death as he entered. The witnesses, feeling that the prisoner finished his life as he entered. The witnesses, feeling that the prisoner finished his life as he entered.

"Let him make his statement," said the warden. "Whitey Lewis" stepped forward to move, and in the brief interval before death he made his declaration that he "had not shot at Rosenthal."

The switch was again thrown on at 5:47, and he was pronounced dead at 5:52.

Again the chamber was emptied and again filled with witnesses. At 5:55 "Tipp the Blood" was brought in. He had a Jewish prayer book in his hand and a small golden watch on his wrist.

Two shocks were given and at 6:02 clock physicians pronounced the man dead.

"Little Louis," the last of the four to die, and accordingly the keenest sufferer by reason of the long interval of waiting, entered the chamber at 6:05. He was not until 6:17 that he was pronounced dead.

All the bodies of the gunmen will be claimed by relatives.

HOROWITZ WORKED IN TORONTO

Toronto, April 12.—Harry Horowitz, who was electrocuted in New York this morning, had worked in the gunnery, was for three months in the summer of 1912 a "check boy" in the office of the G. C. C. Co., a company here.

He was a typical "boy" with all the yearning and most of the "vices of a kind," said a man who knew him. He was a young man and talked like the heroes in books. He was not all that he seemed. He was a young man and talked like the heroes in books.

Toronto Cattle Market

ENGINEER SIFTON BUILDING PERMITS TO DAY

Something About Career of Hydro Manager

Also About His Assistant "Billy" Childs

R. J. Shephard, concrete shed, 225 John street north, \$200.
R. J. Kennedy, two brick dwellings, John street north, \$400.
R. C. Petch, brick store, Robins avenue, for Misses Lee and Merritt, \$2,000.
R. C. Petch, alterations to 200 Ottawa street, for Mrs. Spencer, \$450.
R. C. Petch, frame dwelling, Palmerston avenue, for Mrs. E. Black, \$250.
J. E. Holt, alterations to 533 Fairview avenue, \$100.

It is to E. I. Sifton that a great deal of the credit is due for the extraordinary success of the Hydro system in this province, considering its practically recent installation. There is a feeling in civic circles that no better manager could have been found for the local Hydro department than Sifton, who was appointed to the position by the Hydro Commissioners on Saturday last at a salary of \$4,500, with the privilege of devoting five per cent of his time to his private consulting occupation.

Mr. Sifton was born in Middlesex County not so many years ago, and graduated in the Toronto School of Practical Science in the year 1886. He then spent ten years in electrical manufacturing construction. This experience being chiefly gathered in London, Ont., and he was in the employ of the City of London corporation for twelve months when he took to himself the name of a consulting electrical engineer.

He was called in by the City of Hamilton to make reports on the whole electrical situation of the city, and after six weeks' careful investigation into all its phases he handed in his report on May 19, 1911, and when it was definitely decided to install the Hydro system, Mr. Sifton was retained as consulting engineer for the city, after its installation. He has given such good satisfaction to the authorities that the Hydro Commissioners felt they could not do better than retain his services as manager, even though others might have accepted the position at a slightly higher salary.

By Sifton is thought so highly of by his colleagues in the Hydro system in other municipalities that a few weeks ago was appointed vice-president of the Ontario Municipal Electrical Association, when that body held its first meeting in Toronto.

W. H. Childs is a Hamilton born man as was his father, mother and grandfather. He has been in the contract department of the Hydro system since its inception, and is now in this city and is expected by all who know his ability to fill with credit, and with system and energy, the position of assistant business manager to which he was appointed at the same time as Mr. Sifton was appointed manager.

This magnificent church edifice, one of the finest in Canada, has just been opened for public worship. The church cost over \$130,000, including \$12,000 of the cost of the organ. The seating capacity is 1,400. It has a Sunday School above the ground with about 20 individual classrooms, with separate apartments for primary work. Other rooms include gymnasium with shower baths, social hall with accommodation for over 600 ladies' parlors, choir vestries, minister's vestry, kitchen, etc. The whole building has a system of forced ventilation, the air being washed of impurities before being sent out, and on through the building. In summer the temperature can be reduced as desired. The lighting is concealed and

Driving through Camp Hill one morning, I approached a handsome and we were very much interested in the entrance stage addressed to me by name and requested a new monument. I was a bit of a puzzle to me, but I was not surprised at his knowledge for I have known him for many years.

The next day I drove up to the stable at the rear of the house and was greeted by my gardener, who was a slightly preoccupied man, but informed me that he had seen the dogs. I was stretched to nearly a half hour, and I was very much interested in the dogs. I was stretched to nearly a half hour, and I was very much interested in the dogs.
